

MConnect

KEEPING YOUR BUSINESS CONNECTED

TRANSFORM WITH TECHNOLOGY

M247⁷

We believe in transforming businesses through intelligent and tailored technological solutions.

We configure networks and systems to help your business connect with more places, serve more customers and employ more people.

But it's not just about powering your operations, it's about us investing in your business as much as you do. Thinking about tomorrow and not just today, supporting you to achieve great things through technology.

That's why we never outsource our support services, so our team of technical experts are always here when you need them.

M247 Services

M247 products are developed with business growth in mind, whatever your requirements we have the technology to help you transform.

MPLS Solutions

PRIVATE NETWORKS FOR YOUR BUSINESS

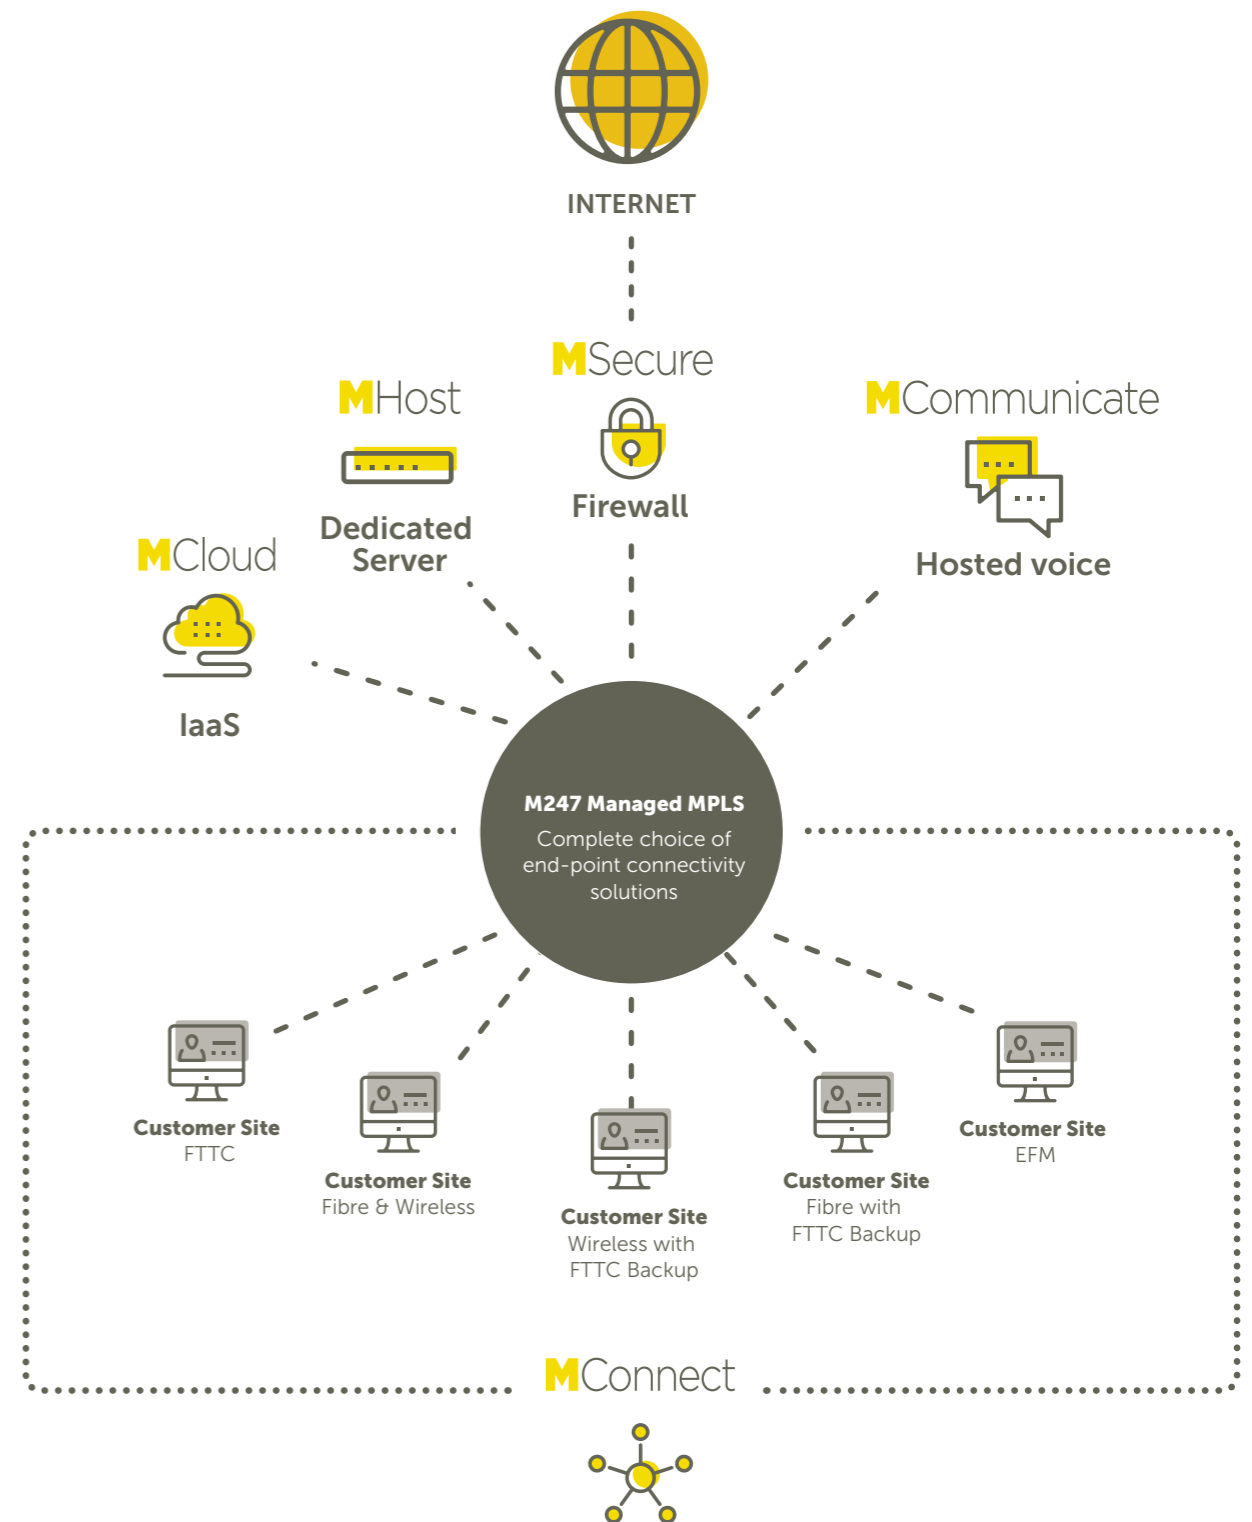

Our MPLS solutions allow multi-site businesses to share IP services, and data, via our high bandwidth core network. All our services can be integrated to provide a bespoke private network, giving you the right support when and where you need it.

- Fully managed network – reducing business overheads
- Visibility and monitoring 24/7/365
- Seamless integration of all sites globally, regardless of access mechanism
- Eliminates the need for multiple IPSec VPN connections
- Fully scalable both nationally or internationally
- Fast delivery

Connectivity Solutions

THE COMPLETE CHOICE FOR NETWORK CONNECTIVITY

Connections that Count

TAILORED CONNECTIVITY FOR EVERY NEED

We believe connectivity should be simple, so whatever your business size, sector or location our global network of transit and exchange points ensure your business gets connected quicker.

We offer unique wired and wireless connectivity solutions, so you can connect in a way that works for your business.

Wireless Leased Lines

UNRIVALLED PERFORMANCE WITHOUT THE WIRES

Wireless Leased Lines provide all the benefits of a traditional leased line service, but without the hassle and complexities of installation that can come with wires.

Our next generation independent network gets you connected fast, using industry-leading radio and microwave technology, and provides flexibility and scalability to grow with your business.

- Bandwidth between 10Mbps and 2Gbps
- Dedicated connectivity for your business
- Superfast installation – in under 25 working days*
- Fixed installation costs
- Guaranteed network availability with 99.95% uptime and 4-hour fix
- 100% independence from BT exchanges
- Scalable and flexible in-line with your business requirements
- Low latency for cloud services and VoIP
- Connectivity via DIA, MPLS and Layer 2
- 24/7/365 monitoring
- Guaranteed SLAs

Point of Presence (PoPs)
across the globe

Leased Lines

THE POWER OF BIGGER BANDWIDTH

Leased Lines provide businesses with superfast bandwidth network data services via our global fibre or radio networks. Whether it's connecting one office to another or connecting to the internet, we can provide a solution that fits your business needs.

- Symmetrical uncontended bandwidth in excess of 10Gbps
- Guaranteed network availability with 99.95% uptime
- DIA, MPLS WAN or P2P configuration options
- Dedicated, unlimited circuit exclusively for your business
- Fixed IP addressing
- Primary and secondary DNS provision
- 24/7/365 monitoring
- Fixed OPEX costs over the term of the contract
- Fully integrated with our Wireless Leased Lines to deliver unrivalled diversity
- Flexible contract terms

EFM

COST EFFECTIVE CONNECTIVITY

EFM offers your business all of the advantages of a fibre network, but uses existing copper phone lines to deliver lower prices and shorter lead times. EFM can still offer scalable bandwidth options, and is delivered as a non-contended service – which makes it a great alternative to a Leased Line.

- Symmetrical uncontended bandwidth up to 35Mbps
- Dedicated circuit for your business
- Guaranteed network availability with 99.95% uptime and 7-hour SLA
- UK wide connectivity
- Fast installation - approximately 25 working days*
- Cost effective alternative to Fibre Leased Lines.

*from landlord approval

FTTC

SUPERCHARGED CONNECTIVITY

Fibre to the Cabinet (FTTC) is the most cost-effective type of connectivity. The next-generation of ADSL, FTTC offers significantly higher upload and download speeds than a traditional ADSL line.

Connection speed is impacted by the distance of your business from the cabinet, however download speeds of 76Mbps and upload speeds of 19.5Mbps are possible.

- Unlimited business usage
- UK wide coverage
- Choice of service bandwidth options
- Connections can be delivered onto existing PSTN line within 10 working days.
- Cost effective backup and diversity when integrated with our Wireless or Fibre Leased Lines or EFM solutions
- Compatible with other M247 products including multi-site MPLS networks, Colocation, Managed Security and VoIP.
- Installation within 10 working days.

Datacentre Backhaul

WHOLESALE NETWORK SOLUTIONS

MPLS Ethernet Backhaul circuits provide point to point connections between two on-net datacentres, regardless of location around the world, through Metro Ethernet or Long-haul Ethernet.

- Built on highly redundant 10/100Gbps links
- 100% diverse paths for maximum uptime
- Q-in-Q VLAN tagging support
- Route protection over multiple backbone routes as standard
- MPLS capable network
- Services available across Europe
- Flexible bandwidth: MPLS from 10Mbps to 100Gbps+
- High MTU up to 9000+ MTU on all our backbone

Over **34,000**
clients
across 92 countries

IP Transit

SCALABLE SOLUTIONS ACROSS EUROPE

IP Transit solutions allow ISPs, content and applications providers and operators to offer a high capacity, low latency internet connectivity solution. We're all about providing internet traffic management and broadband which is scalable, efficient and flexible.

Connected with the most important IXPs in Europe

(DE-CIX, AMS-IX, LINX, LONP, Equinix IX, VIX, NL-IX, Swiss-IX, Peering, CZ, Interlan, RoNIX, BalkanIX, BiX NetIX)

Private peering through major European ISPs

HE, DTAG, OTE, Liberty Global, Interoute, Cable & Wireless, Etisalat, Facebook, TDC, Telenor, Zayo, Jazztel/Orange Spain, EE, British Telecom, Sky, Telin, Bezeqint, Telstra, Pacnet, CPRM, Retn, OVH, Talk Talk, Virgin Media, GlobalCloudXchange

Direct BGP session with almost all major Tier 1 carriers across the globe

Cogent, NTT, GTT, Level3, Telecom Italia, Telia

- Flexible full and partial transit options
- Reduced cost option with partial transit
- Dual stack IPv4 and IPv6 network
- Configured with both IPv4 and IPv6
- Optimised for best latency through PNIs, IXPs and Tier 1 connections
- Reliable customer service through flexible NOC

Success Stories

M247 has really set the bar high within their industry, there is no other provider out there who can match them. They are really flexible to our needs – we are fast paced at everything we do, our business never stops and neither does M247. We wouldn't be able to grow our business in the way we do without the support from them.

AO.com

The solution provided by M247 is exactly what we needed, and as they own their own infrastructure it gives us the scalability and flexibility we need. The speed of response is second to none. Not only that, their customer service, from pre-sales and provisioning through to day-to-day support has been first class. I have never dealt with a team that is so knowledgeable about the technology they are providing.

Total Fitness

The support we have received from M247 is brilliant, the team are willing to be flexible and to work out of hours to deliver our solutions as and when we need. There is plenty of engagement offered and available from the whole team, even with our shortest temporary contracts. The round the clock service is unbeatable. The urgency of our projects is always understood and accommodated for. The company really has a can do attitude and are so easy to deal with. We never have to worry about our connectivity services with M247.

Laing O'Rourke

M247's portfolio of internationally enabled products encompasses everything from global MPLS Connectivity, Public and Private Cloud infrastructure and Hosting, to a suite of Security and Communication Services that enable you to operate your business at a truly globally integrated scale.
