

**M**Secure

POWERFUL PROTECTION  
FOR YOUR DATA AND NETWORKS

TRANSFORM WITH TECHNOLOGY

**M**247<sup>7</sup>

A man with short dark hair and glasses, wearing a light blue checkered button-down shirt, is smiling and looking at a smartphone on a table. He is in a meeting with other people, whose heads and shoulders are partially visible in the foreground. The background is a bright, modern office space with large windows and green plants.

We believe in transforming businesses through intelligent and tailored technological solutions.

We configure networks and systems to help your business connect with more places, serve more customers and employ more people.

But it's not just about powering your operations, it's about us investing in your business as much as you do. Thinking about tomorrow and not just today, supporting you to achieve great things through technology.

That's why we never outsource our support services, so our team of technical experts are always here when you need them.

# M247 Services

M247 products are developed with business growth in mind, whatever your requirements we have the technology to help you transform.

## Managed Firewalls

CONTROL AND MANAGE YOUR NETWORK TRAFFIC

Firewalls are a vital component of your network security control. This gateway-level solution uses predetermined rules to analyse and manage the traffic that enters and leaves your network.

We can implement hosted, virtual, dedicated and on-site firewall solutions, based on tried-and-tested hardware. Our technical team will work with you to find the right solution, with strict SLAs in place to make sure every network element is covered for repairs.

There are no hidden costs because the solution is delivered as a fixed-cost managed service.

- Pre-configured and fully managed by M247
- Complete unified threat management - includes scanning traffic for viruses, anti-spam, web filtering and instruction prevention
- Three configuration change requests per month
- Powered by Fortinet and Corero

## Tailored Security Options

Robust digital security is important for any organisation, but it's absolutely critical for ambitious, growing businesses. The cyber threat facing companies has never been greater, but our tailored secure solutions mean you can stay focused on your business and commercial growth.

- Latest technology from leading partners such as Fortinet and Corero
- Flexible solutions designed to work together in almost any combination, as single solutions or as a complete package
- Enterprise grade secure servers
- ISO27001 Security Standard

support

# Managed DDoS Protection

SECURE YOUR NETWORK AGAINST LARGE-SCALE ATTACKS

**No network operator likes to hear the phrase 'DDoS attack', but we'll help you stay fortified against this kind of large-scale security threat.**

Our scalable and efficient anti-DDoS solutions are designed to detect and successfully mitigate advanced attacks which aim to exploit applications, web servers and DNS vulnerability, and even hit-and-run or botnet-type attacks.

This level of protection is crucial for websites and customer-facing portals. Our solutions have been developed to protect uptime, data integrity and ultimately safeguard your revenue and reputation. Our trained and experienced engineers are there to support you during any attempted attack and use the most sophisticated security technology, bringing in the right tools for the job.

- Absorbs traffic spikes and "scrubs" data to pass on only "in profile" data
- Mitigates multiple vector attacks
- Continued service with DDoS attempt successfully mitigated

# Data Backup

ROBUST AND RELIABLE

Securely backing up huge volumes of data - and making sure it remains easily accessible - doesn't have to be a daunting task.

We provide powerful tools for the robust and reliable backup of mass email exchanges and entire working databases. Because we own our secure datacentres, without third-party involvement, we can offer complete control and a high level of assurance. Our datacentres are some of the greenest and most efficient in Europe.

- Simple-to-use solutions - get quick and easy web access to archived files
- Restore options that best suit your needs
- Continuous data protection - block level backup for your data
- All standard operating systems covered
- Backup virtualised platforms such as VMWare, Xenserver or Hyper V

Presence in  
**over 40**  
datacentres globally

## Content Filtering

PROTECT EMPLOYEES AND BOOST PRODUCTIVITY

Content Filtering is not just about blocking inappropriate content - we empower network owners to operate responsibly by controlling the types of content that people can access and view.

Delivered as a fully managed or co-managed service, our Content Filtering packages are available at a fixed rate, so you can protect employees, pupils and vulnerable people. Use them to keep everyone safer in the digital world.

- Web browser management across specified websites, including social media
- Time-of-day and duration-based controls
- Meet compliance requirements with comprehensive browsing habit reports
- Internet Watch Foundation list provide bases for protection
- Optional customised policies for users, content categories or location

## Success Stories

M247 has really set the bar high within their industry, there is no other provider out there who can match them. They are really flexible to our needs – we are fast paced at everything we do, our business never stops and neither does M247. We wouldn't be able to grow our business in the way we do without the support from them.

**AO.com**

The solution provided by M247 is exactly what we needed, and as they own their own infrastructure it gives us the scalability and flexibility we need. The speed of response is second to none. Not only that, their customer service, from pre-sales and provisioning through to day-to-day support has been first class. I have never dealt with a team that is so knowledgeable about the technology they are providing.

**Total Fitness**

The support we have received from M247 is brilliant, the team are willing to be flexible and to work out of hours to deliver our solutions as and when we need. There is plenty of engagement offered and available from the whole team, even with our shortest temporary contracts. The round the clock service is unbeatable. The urgency of our projects is always understood and accommodated for. The company really has a can do attitude and are so easy to deal with. We never have to worry about our connectivity services with M247.

**Laing O'Rourke**

M247's portfolio of internationally enabled products encompasses everything from global MPLS Connectivity, Public and Private Cloud infrastructure and Hosting, to a suite of Security and Communication Services that enable you to operate your business at a truly globally integrated scale.
