Managed Servers

 24Seven
Connectivity without compromise

Managed Servers

Accessible securely from anywhere in the world via the internet

Managed Servers:

In our Managed Server solution, equipment is leased to the customer over a contract term and is hosted within one of M24Seven's Tier 2-3 datacentres.

Managed Servers include:

- Server hardware
- Software licenses
- Network connectivity
- 24/7/365 datacentre security; space, power, air-con and all the redundancy features of a Tier 2-3 DC
- All hardware maintenance
- Operating System software patching
- 24/7/365 proactive monitoring and maintenance
- Optional Managed Backup and Managed Firewalls

Key product features

- Choice of 3 options: Lite, Standard and Premium
- All three options include Terrabit bandwidth
- Burstable up to 100Mbps billed on the 95th percentile across whole month
- Up to 8 IP addresses
- Linux OS Fedora Core, Apache Web Server, MySQL Database, Perl 5
- Email server
- Remote Server Access, File Transfer Protocol (FTP) server

- M24Seven are responsible for the operating systems, general hardware, and bandwidth, with control of software and installation remaining with the customer
- Bespoke specifications available

Key business benefits

- Accessible securely from anywhere in the world via the internet
- Multiple resilient links
- Secure datacentre facilities
- Reduce costs and risks
- Vital part of a comprehensive disaster recovery strategy for small, medium and enterprise-sized businesses
- Big company tools, made available for SMEs

Applications

- Disaster recovery
- Any application that requires hosting on a server (email, website, data storage, FTP)
- Any service that needs to be centrally accessed by multiple users
- Suitable for companies with little in-house IT infrastructure
