Connectivity without compromise

Managed Firewalls

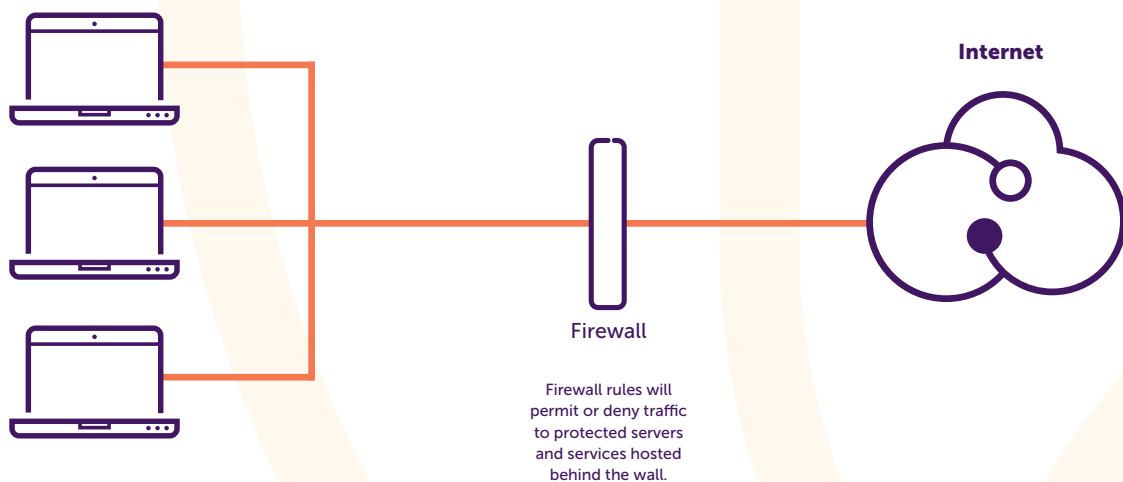

Take control over digital security

Staying ahead of all threats should be simple and straightforward. At M24Seven, we ensure you have the best level of protection available to you.

We enable organisations of all sizes to secure their network, systems, users and business critical data, with a deep level of protection that won't compromise network performance.

We do this by offering end-to-end software and hardware solutions.

Firewalls are crucial gateway-level security solutions that use predetermined security rules to analyse and control the traffic entering and leaving any network.

Product benefits and features

- Pre-configured and fully managed by M24Seven
- 3 configuration change requests per month
- Complete UTM (Unified Threat Management) functions, including scanning traffic for viruses, anti-spam, web filtering and intrusion prevention
- Ability to terminate VPN connections for remote offices securely on your firewall device and allow secure remote user access

Business benefits:

A better and safer way to work:

M24Seven has partnered with Palo Alto and SonicWall to provide competitive and effective hardware based security systems that utilise the best and most sophisticated security technologies available.

Customised service:

Our Managed Firewalls are deployed in small and medium sized organisations as well as distributed to enterprise environments, government, retail point-of-sale, healthcare and service providers.

Reliability:

Our technical team will work with you to determine the right solution and with strict SLAs to ensure that every element is covered for repairs.
